

THE STEALTH KITCHEN

When a Room needs to be
More ~ and Less ~ than a Kitchen!

If an exposed conventional kitchen would compromise the integrity of your design, you now have an alternative solution! YesterTec's space saving, extra deep Stealth Kitchen Modules allow the countertop, sink and all of the appliances to be concealed behind designer selected door and drawer panels. Key to this extraordinary line is YesterTec's patented, U.L. Listed technology that allows the 'hot' appliances like ovens and cooktops to operate only when the pocket doors that conceal them are opened.
